Release of Telephone Call Tracking Information

**Summary/Purpose:** Defines the policy for releasing telephone call tracking data.

**Call Tracking for phone numbers assigned to an employee:**

The Telecommunications Center will not release call tracking data (date, time, telephone number, length of call) about calls made to or from a University telephone number that is assigned to an individual employee unless proper authorization is obtained by the person requesting the information from the Director of University Police and Campus Safety.

The person requesting call tracking data will send a confidential memo to the Director of University Police and Campus Safety, with a copy to the Director of Telecommunications, detailing the need for this information. The memo must provide the following:

- Reason for needing the information
- Approximate time when call was made or received
- Date call was made or received
- Telephone number(s) call was made from or received on
- Signature of the person wanting the information

If approved, the Director of University Police and Campus Safety will signify approval by making a note of approval, dating, and signing the memo. The Director will send the approved signed memo to the Director of Telecommunications in an envelope marked “Confidential” by campus mail.

If information is found, the Director of Telecommunications will print the results, attach a copy of the request, and forward the information in an envelope marked “Confidential” to the person that requested the information.

**Call Tracking for phone numbers assigned to a department**

Requests for call tracking of calls made to a departmental number (not assigned to an individual) can be requested via email to the Director of Telecommunications by the department head. Telecommunications will verify that the phone number is not assigned to an individual and then email the call detail report back to the department head.
